

## BUILDING

### STAINLESS STEEL AISI304 WELDED MESH

**Suggested uses:** plaster and insulation coatings, concrete reinforcement

<i>Mesh</i>	<i>Wire</i>	<i>Width</i>	<i>Roll lenght</i>	<i>Section</i>	<i>Tensile Strenght</i>
<i>mm</i>	<i>Ø mm</i>	<i>mm</i>	<i>m</i>	<i>mm<sup>2</sup></i>	<i>Kg/m</i>
24 x 24	0,60	1000	50	11	660
24 x 24	0,80	1000	50	20	1200
24 x 24	1,00	1000	25	31	1800

Possibility of directly providing the stainless steel fixing system to make extremely stable and rapid anchoring of the welded mesh to the surface to be coated, with lower costs compared to the expansion plugs.

Quantity suggested: 3 fixing system / m<sup>2</sup>

Some data show in the comparative lists can be rounding up or down and consequently are not absolute
